

1200 POWER PLUS

Destiny™  
Starkey®

Clearly powerful,  
powerfully clear.

Destiny™ is the only hearing instrument built with cutting-edge nFusion™ Technology, offering superior sound quality, comfort, convenience, and virtually no feedback.

We call it the Destiny 1200 Power Plus because this is simply the most powerful digital directional hearing aid on the market today.

Designed for patients with severe to profound hearing loss, this powerful device uses breakthrough nFusion Technology to give you better, clearer hearing, even at extremely high levels of gain. And like all our other Destiny products, the Power Plus comes loaded with advanced features, including:

**ACTIVE FEEDBACK INTERCEPT** — The most effective feedback cancellation system on the market today, AFI uses 16 sub-bands and a patent-pending technology that virtually eliminates whistling, squealing, and other irritating feedback sounds, as well as the artifacts many feedback cancellers leave behind.

**ACOUSTIC SIGNATURE** — A state-of-the-art sound management tool that automatically detects and classifies different sound environments, then adjusts automatically. With Acoustic Signature, you can move from crowded restaurant to taxi to home, without ever making a manual adjustment.

**DIRECTIONAL SPEECH DETECTOR** — Directional performance even in the noisiest of conditions. This technology continuously monitors environments and adjusts for better speech intelligibility, even in crowds.

**AUTOMATIC TELEPHONE** — Provides strong telecoil performance combined with the ease of automatic activation. The hearing system senses the presence of an analog (standard telephone) signal and switches within seconds, alerting you with a tone and allowing you to hear clearly.
