Face it!

There *is* a hearing device
you'll want to wear

A fusion of style and performance

When you visualize hearing aids

...you probably imagine them to be big, bulky, beige "bananas". But look at Delta: It's tiny, triangular, and available in 17 vibrant colours. Its futuristic appearance has already won a prestigious design award.

Mr. Magnusson, Sweden

"It's small, it's elegant, you can't see it - and you don't have to do anything!"

"I love the size, I love the style and I love dressing up. I keep forgetting the other great part - that I can actually hear."

No more awkward moments

Like lots of people

... you've probably experienced these awkward moments where you smile and nod, even though you've lost the thread of the conversation.

With Delta, you can feel confident that you won't miss a thing and you can enjoy socializing with family, friends or colleagues.

As easy as 1, 2, 3

Delta is so straightforward that you can wear it and forget all about it. Whether you're working, socializing or just relaxing in front of the TV, crystal clear sound quality will make listening more enjoyable.

Ms. Matsuhashi, Japan

"The best thing about Delta is that you can be part of daily life again. With Delta I can hear the speech - just like other people!"

"Now I can sit down anywhere I want and hear everything. I do not speak as loud as I used to, which is a very pleasant improvement - for me and for other people!"

Mr. Wielder, The Netherlands

"I couldn't believe how small and light it was. I was amazed at how thin the tubing and how small the earpiece was. No one at work even noticed the hearing device. It's brilliant!"

Ms. Hogan, UK

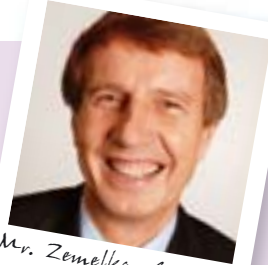

Make it uniquely yours

Which Delta are you?

With Delta, you can look good and feel great, all day long. Delta is worn behind the ear and it will stay hidden if you want it that way. But you might be tempted to show it off once in a while. Available in 17 attractive colours, there is bound to be one to reflect your personality.

People first

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
